## PREGNENOLONE 10MG

### PREGNENOLONE

The #1 Adrenal Hormone

☐ Supports patients with Adrenal Fatigue and stress

☐ The most abundant hormone produced by the adrenal glands

☐ Important for patients wanting sharper focus and brain attention

Pregnenolone is a hormone produced by the adrenal glands. With prolonged stress exposure, the adrenal gland capacity to manufacture this important hormone diminishes over time. Pregnenolone helps the body respond appropriately to stress and is also a very important hormone for optimal brain function and activity.

The body also uses pregnenolone as a chemical base to make other important hormones such as estrogen, testosterone, progesterone, and DHEA.

Additionally, as we age, our adrenal glands make less and less pregnenolone as our hormone manufacturing capacity declines.

This loss can be accelerated in the face of unremitting physical or psychological...

## DHEA 5MG

### DHEA

A Natural Adrenal Hormone

- Important for patients looking for more male energy and performance
- Targets patients wanting more libido, sexual drive
- Supports patients looking to reduce cellulite
- Great for patients who need to reduce belly flab

Without sufficient DHEA, men and women are more likely to have dry skin, poor body hair (under arms, on legs, on arms), more cellulite, more joint aches, and flabby belly fat.

On our psyche, low levels of DHEA are likely to mean more anxiety, depression and fatigue as well as limited abilities to cope with stress, and low libido (sexual appetite).

In women, DHEA is more important than testosterone in maintaining a woman's sexual interest and responsiveness.

Usual Dosage: For males: 25mg, upon rising. For females: 5mg, upon...

## MELATONIN DISSOLVING TABLET

### Fall Asleep Faster, Stay Asleep Longer

Melatonin is made by the tiny pineal gland located in the back of the brain. The pineal gland secretes melatonin at night to help us fall asleep and stay asleep. As we age, the pineal gland secretes less and less melatonin, making it more difficult for us to enjoy the benefits of a full night's rest.

And nothing will make you feel your age (or older!) than a chronic lack of 7 ½ - 8 hours of restorative sleep.

If you have trouble falling asleep, consider using the instant release melatonin that dissolves under the tongue. If you cannot stay asleep, consider using the extended release melatonin that allows the continual release of small doses of melatonin to keep you asleep.

Melatonin also helps to regulate our internal clocks that tell us when it is supposed to be day and when it is supposed to be night. If you fly across two or more time zones in a day, your body clock will be out of sync with the new time zone, leading to jet lag....
