BONE

NEW and IMPROVED

- ✓ Now in capsules for enhanced absorption and tolerability
- ✓ Made with MCHC calcium for maximum effectiveness

WHAT IT IS:

- Superior calcium supplement
- Contains every ingredient to build and maintain healthy bones

WHY YOU NEED IT:

- Rebuilds weak bones
- Maintains healthy bones
- Provides important calcium to your body

Calcium is one of the body's most important minerals and is best known for keeping the bones and teeth in good health. The average American diet contains less than half the amount of calcium needed for healthy bodies.

Everyone needs calcium everyday, and what the body does not get from the diet, it will steal from your bones. This can cause thinning of the bones, also known as osteoporosis. Taking the right kind of calcium supplement in the right amounts can keep your bones healthy or rebuild bone that has been lost.

HOW IT HEALS:

It is hard for the body to absorb calcium from your food or most vitamin tablets. Taking the right calcium supplement that is well absorbed is essential for healthy bones and teeth.

Always consult your doctor before taking any of these products.

And it takes more than just calcium to build and maintain healthy bones.

Bone by MyBestHealth is made with MCHC (MicroCrystalline HydroxyApaptite) which 10 years of clinical trials has proven the best type of calcium to take. MCHC is better absorbed and is better at building bones than any other type of calcium supplement.

MCHC is a superior, all-natural calcium source because it contains everything the body needs to absorb calcium and turn it into good strong bones and teeth. In addition to calcium, MCHC contains perfectly balanced amounts of essential phosphorus, bone building proteins, and bone-building minerals.

Our Bone supplement contains additional magnesium and natural vitamin D to complete this important vitamin. For your safety, Bone is free of heavy metals and other contaminants.

To build and repair healthy bones, you must provide every ingredient in bone tissue, enhance intestinal absorption, and then precisely stimulate the body to knit these ingredients to build strong bones. Bone by MyBestHealth meets these important characteristics and its superior nutritional formula makes it the supplement of choice for bone-building support.
